Routed Systems Designer, Piping or Cabling

Three Limited Time OFFERS for Active Maintenance Customers

HURRY – OFFERS EXPIRE MARCH 20, 2006

If you're an active PTC Maintenance Support customer involved with piping, cabling, or routed systems design, here's a great deal just for you – but it's only for a limited time.

Right now, you can have three of our fully integrated Pro/ENGINEER modules each for 50% off list price! Not only will you save time, effort, and money, but since each module is 100% compatible with Pro/ENGINEER, it will fit perfectly with your current product development system.

NOW 50% OFF Pro/ENGINEER Routed Systems Designer

- Create schematic designs quickly and easily
- Produce complete system documentation regardless of complexity
- Work with a multi-disciplinary solution that includes ladder, wiring, piping, and hydraulic schematics
- Drive 3D cabling and piping routing directly within Pro/ENGINEER
- Achieve concurrent design for greater team efficiency
- Promote design reuse and automation using a complete suite of diagramming tools

NOW 50% OFF Pro/ENGINEER Piping Design

- Logically reference Pro/ENGINEER RSD schematics to capture all relevant systems information
- Gain full routing capabilities, including specification-driven design, for strict adherence to design rules and schematic logic
- Work with a customizable library of standard fittings, which fosters design speed and re-use
- Eliminate the need for physical prototypes through virtual interference checking and automated manufacturability verification
- Produce accurate documentation – isometric drawings, bend tables, bills of materials – for cost-effective manufacturing

NOW 50% OFF Pro/ENGINEER Cabling Design

- Improve time-to-market and reduce costs through virtual prototyping and automated routing of cables, significantly reducing tedious tasks
- Implement concurrent engineering, as routed cables automatically update as the product design develops
- Increase the quality of your designs by providing the best cable design
- Determine the best cabling route possible, quickly, instead of wasting significant time with a trial and error approach

Visit www.ptc.com/go/proerewards or call 1.888.782.3776 to request a live demo, or to receive more information about these offers.
