

Pro/INTRALINK Data Migrator 8.0 Compatibility Matrices

Revision 2.5

Released 10 September 2007

Introduction

This document contains information pertaining to software compatibility, platform support, and language support for the Pro/INTRALINK Data Migrator.

Software Compatibility

The table below illustrates the support matrix for the Pro/INTRALINK Data Migrator. For each release of the Pro/INTRALINK Data Migrator, the table shows the version(s) of Pro/INTRALINK 3.x along with the versions of Windchill PDMLink and Pro/INTRALINK 8.0 for which migration is supported. PTC recommends that the latest released version of the Pro/INTRALINK Data Migrator is used for migration activities based on the compatibility matrix listed below.

	Source System	Target System ⁽¹⁾	
Pro/INTRALINK Data Migrator Version	Pro/INTRALINK Version(s)	Windchill PDMLink	Pro/INTRALINK
8.0 F000	3.3 M02x and 3.4 F000+	8.0 F000	8.0 F000
8.0 M010	3.3 M02x and 3.4 F000 +	8.0 F000 – 8.0 M010	8.0 F000 – 8.0 M010
8.0 M020	3.3 M02x and 3.4 F000 +	8.0 F000 – 8.0 M020	8.0 F000 – 8.0 M020

	Source System	Target System ⁽¹⁾	
Pro/INTRALINK Data Migrator Version	Pro/INTRALINK Version(s)	Windchill PDMLink	Pro/INTRALINK
8.0 M030	3.3 M02x and 3.4 F000 +	8.0 F000 – 8.0 M030	8.0 F000 – 8.0 M030
8.0 M040	3.3 M02x and 3.4 F000 +	8.0 F000 – 8.0 M040	8.0 F000 – 8.0 M040

Notes:

1. The Pro/INTRALINK Data Migrator only supports migrations to Windchill PDMLink or Pro/INTRALINK 8.0 configured with supported Oracle database versions. It does not support migrations to these systems configured with Microsoft's SQL*Server.

Certified Platform Support

The Pro/INTRALINK Data Migrator is installed on the same system where the Windchill method server(s) is running. Below is a list of those server platforms for which the installation and execution of the Pro/INTRALINK Data Migrator is certified.

Pro/INTRALINK 8.0 or Windchill PDMLink 8.0 Server Platform					
Pro/INTRALINK Data Migrator	Windows 2003 Server	Solaris 9	Solaris 10	HP-UX 11i V1 (PA-RISC)	AIX 5.2 (5200[-02 or higher]) /AIX 5.3 (5300[-02 or higher])
8.0	X	X	X ²	X	X ¹

1 - Starting with 8.0 M030 the Pro/INTRALINK Data Migrator now supports AIX.

2 – Starting with 8.0 M040 the Pro/INTRALINK Data Migrator provides support on Solaris 10

Note: The list of certified platforms is a subset of those server platforms supported by Windchill PDMLink and Pro/INTRALINK 8.0. If your server platform is not supported, a temporary Windchill PDMLink server can be staged on one of these certified platforms for the purposes of migration. After the migration is completed, the production server can then be directed to the migrated database.

Language Support

The Pro/INTRALINK Data Migrator provides the following language support for each of the available releases. Language support is defined as supporting the migration of data from Pro/INTRALINK data server of language X containing data of language X to a Windchill PDMLink server also of language X, where X can be substituted by any of the supported languages listed below.

8.0 F000 – 8.0 M040:

English, German, French, Japanese, Chinese Simplified, Chinese Traditional
